Frequently Asked Questions

Q: What do I have to do to complete the live Webinar successfully?

To obtain the 4 contact hours associated with this course, the health professional will need to sign-in (by typing in the chat-box), attend the course online, and complete the program evaluation form and post-test electronically. At the end of the program, after all the evaluation and post-tests are accounted for, the health professional successfully completing the program will receive a statement of credit. This will take approximately 3 to 5 business days. This is an intermediate-level course.

Q: How will I know that my profession qualifies for continuing education credit?

Please see the section marked Accreditation. All professions for which INR (Institute for Natural Resources) has approval are listed in the Accreditation section.

Q: What happens if I have technical difficulties watching or hearing a Webinar?

You can transfer the tuition paid to another Webinar within two years or request a recording within 3 to 5 days to complete the webinar ASAP for live credit.

Q: My profession is not listed on the brochure. Is it possible to obtain continuing-education credit?

Possibly. Please contact INR's customer-service office at 1-877 246-6336 or by email at info@biocorp.com. The customer-service office can tell you if INR has approval for your profession.

COURSE SUMMARY

Inflammation is a normal response of living tissue to damage or cellular injury. It is the immune system's first line of defense against irritation or infection. Unchecked, progressive inflammation can cause serious illness and even death in patients of any age. However, the ravages of uncontrolled inflammation observed in various forms of vascular disease, cancer, metabolic disorders, sepsis, neurodegenerative disorders, and autoimmune conditions often spiral out of control in mid-life and beyond.

Accurately recognizing the pathophysiology involved in any illness is essential in determining the correct diagnosis. It is even more important in formulating an effective treatment plan. This webinar will offer a comprehensive review and update of the processes causing acute and chronic inflammation, as well as the clinical signs and symptoms of inflammatory illness. Particularly relevant here, given the global tragedy of COVID-19, is the inflammatory phenomenon of "Cytokine Storm" and the threat posed by obesity. Unfortunately, fat cells synthesize cytokines just as white blood cells do. The metabolic mayhem caused by excess adipose tissue is often devastating in terms of Hypertension, Diabetes Mellitus, hormone dependent malignancies, Myocardial Infarction, stroke, severe asthma, arthritis, and even Alzheimer's disease.

Finally, the webinar will offer practical strategies to advise patients on the benefits of medically significant weight loss, the importance of high level oral hygiene and creating an anti-inflammatory protocol that works in real life.

Disclaimer: These live interactive INR presentations provide continuing education for health care and mental health professionals with the understanding that each participant is responsible to utilize the information gained in an appropriate manner congruent with his/her/their scope of licenses.

Participants completing this course will be able to:

- 1) identify the clinical signs and symptoms of inflammation.
- 2) describe the role of various cytokines in serious illness including COVID-19 and acute cardiac events.
- 3) discuss the link between obesity and chronic conditions such as hypertension, Type-2 Diabetes, Asthma, and various forms of dementia.
- 4) list the common medical conditions associated with periodontal disease
- 5) describe the practical strategies known to facilitate weight loss and reduce systemic inflammation.
- 6) describe, based on the material presented in this course, the implications for nursing, pharmacy, nutrition, mental health, dentistry, occupational and physical therapy.

INSTRUCTOR

Dr. Laura Pawlak (PhD, RDN, MS) received her Ph.D. in biochemistry at the University of Illinois and her M.S. in nutrition at the University of Illinois.

To become a registered dietitian (R.D.), Dr. Pawlak took her internship in dietetics at the Hines Veterans Administration Hospital in Illinois.

Dr. Pawlak conducted her postdoctoral research in biochemistry at the University of California, San Francisco Medical Center and is the author of 22 scientific publications and many academic books.

An expert in obesity, diet, nutrition, and behavior, Dr. Pawlak, has produced and presented -- nationally and internationally -- hundreds of continuing-education programs for health professionals and others. As a registered dietitian, she counseled clients in the areas of sports nutrition and weight loss.

INR reserves the right to change instructors without prior notice. Every instructor is either a compensated employee or independent contractor of INR.
